FUND FACT SHEET

Target 15® DRUKMacro Distribution ETF

DRKY

AS OF 09/30/26

Fund Description

The VistaShares Target 15® DRUKMacro Distribution ETF seeks high monthly income through a core equity portfolio that generally mirrors the top publicly disclosed holdings of the Duquesne Family Office, the private investment firm of Stanley Druckenmiller, with calls written on the portfolio. The Fund seeks a 15% annual distribution rate, paid monthly.

Cusip	45259A266
Exchange	NYSE
Index Ticker	BVSDRU

Why VistaShares?

Target 15® ETFs are core equity solutions designed to generate monthly income while complementing a traditional equity portfolio. Each fund owns a defined equity portfolio, writes calls on 100% of it, and seeks a 15% annual distribution rate, paid monthly. A target, not a promised payment.

Reasons to Consider

Seeks High Monthly Income

DRKY seeks to generate high monthly income by investing in an equity portfolio and implementing a data-driven options investment strategy.

Core Equity Exposure

DRKY provides full cap range equity exposure that can be considered a portion of the core equity allocation in a well diversified portfolio.

100% Overwritten

A data-driven options strategy writes calls on the whole equity portfolio to collect premium. In exchange, gains above the strike are given up.

Paid Monthly

Distributions are declared and paid each month on a published calendar. Distributions are not guaranteed, may vary and may include return of capital. A distribution rate is not a total return.

Professional Options Management

Leverage the years of experience and rigorous research process employed by the team managing VistaShares' options-based income ETFs.

Key Information

Top 10 Holdings (%)

AS OF 09/30/26

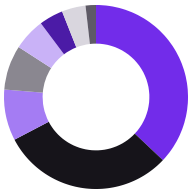

Natera Inc	27.28%	Insmed Inc	4.25%
Taiwan Semiconductor Manufacturing Co Ltd	9.30%	Alphabet Inc	4.23%

10/24/25	10/27/25	10/27/25	10/28/25	$0.25438

Distributions paid through 09/30/26, most recent 12 shown. *The 15% rate is a target the Fund seeks, not a guaranteed payment. There is no assurance the Fund will make a distribution in any given month, and amounts may vary. Distributions may include return of capital. A distribution rate is not a total return. Please see the Section 19(a) notices at vistashares.com.

Important Information

Investors should consider the investment objectives, risks, charges and expenses carefully before investing. For a prospectus or summary prospectus with this and other information about the Fund, please call (844) 875-2288 or visit www.VistaShares.com. Read the prospectus or summary prospectus carefully before investing. Investing involves risk, including possible loss of principal.

Prospectus: https://www.vistashares.com/wp-content/uploads/2025/09/Vistashares_Prospectus_DRKY.pdf

Index / Strategy Risks. The Index's holdings are derived from publicly available data, which may be delayed relative to the then current portfolio of Stanley Druckenmiller or Duquesne Family Office. Consequently, the Fund's holdings, which are based on the Index, may not accurately reflect Stanley Druckenmiller or Duquesne Family Office's most recent publicly disclosed investment positions and may deviate substantially from its actual current hedge fund portfolio. This ETF and VistaShares or its partners have no affiliation with Stanley Druckenmiller or Duquesne Family Office. The equity securities represented in the Index are subject to a range of risks, including, but not limited to, fluctuations in market conditions, increased competition, and evolving regulatory environments, all of which could adversely affect their performance.

Focused Portfolio Risk. The Fund $DRKY will hold a relatively focused portfolio that may contain exposure to the securities of fewer issuers than the portfolios of other ETFs. Holding a relatively concentrated portfolio may increase the risk that the value of the Fund could go down because of the poor performance of one or a few investments.

Derivatives Risk. Derivatives are financial instruments that derive value from the underlying reference asset or assets, such as stocks, bonds, or funds (including ETFs), interest rates or indexes.

Options Contracts. The use of options contracts in this exchange traded fund involves investment strategies and risks different from those associated with ordinary portfolio securities transactions. In exchange traded funds, the prices of options are volatile and are influenced by, among other things, actual and anticipated changes in the value of the underlying instrument, including the anticipated volatility, which are affected by fiscal and monetary policies and by national and international political, changes in the actual or implied volatility or the reference asset, the time remaining until the expiration of the option contract and economic events.

Equity Market Risk. Common stocks are generally exposed to greater risk than other types of securities, such as preferred stock and debt obligations, because common stockholders generally have inferior rights to receive payment from specific issuers. The equity securities held in the Fund's portfolio may experience sudden, unpredictable drops in value or long periods of decline in value.

U.S. Government and U.S. Agency Obligations Risk. The Fund may invest in securities issued by the U.S. government or its agencies or instrumentalities. U.S. Government obligations include securities issued or guaranteed as to principal and interest by the U.S. Government, its agencies or instrumentalities, such as the U.S. Treasury.

High Monthly Income Disclosure: There is no guarantee of how the Fund will perform in the future. There is no assurance the Fund will make a distribution in any given month and the following may vary greatly.

30-Day SEC Yield: The 30-Day SEC Yield represents net investment income, which excludes option income, earned by the Fund over the 30-Day period ended at the most recent month-end, expressed as an annual percentage rate based on the Fund's share price at the end of the 30-Day period.

Distribution Rate: The annual rate an investor would receive if the most recent fund distribution remained the same going forward. The Distribution Rate represents a single distribution from the Fund and is not a representation of the Fund's total return. The Distribution Rate is calculated by multiplying the most recent distribution by 12 in order to annualize it, and then dividing by the Fund's NAV.

Swap Agreements Risk: Swap agreements are entered into primarily with major global financial institutions for a specified period which may range from one day to more than one year. In a standard swap transaction, two parties agree to exchange the return (or differentials in rates of return) earned or realized on particular predetermined reference or underlying securities or instruments.

The Fund may not achieve its investment objective.

By writing covered calls the Fund may limit its potential gains in exchange for premium income.

Distribution Risk – there is no assurance that the Fund will make a distribution in any given month. If the Fund does make distributions, the amounts of such distributions will likely vary greatly from one distribution to the next. Additionally, monthly distributions, if any, may consist of returns of capital, which would decrease the Fund's NAV and trading price over time. As a result, an investor may suffer significant losses to their investment.

DRKY is not affiliated with the Duquesne Family Office or with Stanley Druckenmiller.
