Why VistaShares?

VistaShares ETFs are actively managed by industry and investment leaders to provide Pure Exposure™ to Supercycles®, potentially the most disruptive economic trends of the next 20 years. Our rigorous, patent-pending investment process seeks to identify companies across the supply chain that comprise the most important growth companies in the sector.

Reasons to Consider

High Growth Potential

Spurred by breakthroughs in generative AI, forecasts suggest the global artificial intelligence market could increase more than 300x by 2032.

Source: Bloomberg

Early in AI Supercycle

We believe the AI industry is in phase one of development with the bulk of industry investment focused on infrastructure namely data centers and semiconductors. We currently focus on those “picks and shovels” to strive for maximum potential returns.

Access the Hidden Gems Globally

Our experience in the Artificial Intelligence industry informs our investment process which involves scouring the world for those companies poised to become the next generation market leaders.

Tool for Diversification

We seek to emphasize growth companies which are not likely broadly represented in investor portfolios yet provide significant economic contribution to the sector.

Rigorous Investment Process

Our actively managed “Bill of Materials” based investment process seeks to identify companies across the supply chain that together comprise the most important growth companies in the sector.

Key Information

Top 10 Holdings (%)

| | | | |
|------------------------------------|-------|------------------------------------|-------|
| SK Hynix Inc | 9.10% | GE Vernova Inc | 3.89% |
| Micron Technology Inc | 6.41% | Nvidia Corp | 3.88% |
| Vertiv Holdings Co | 4.99% | Foxconn Industrial Internet Co Ltd | 3.60% |
| Taiwan Semiconductor Manufacturing | 4.78% | Silicon Motion Technology Corp | 3.15% |
| Intel Corp | 4.09% | Legrand SA | 3.15% |

Fund holdings are subject to change.

| Performance | Since Inception | 1M | 3M | YTD | 1Y |
|--------------|-----------------|--------|-------|--------|--------|
| NAV | 71.37% | 13.50% | 7.07% | 13.5% | 74.76% |
| Market Price | 70.36% | 12.76% | 6.21% | 12.76% | 74.20% |

The performance data quoted represents past performance and does not guarantee future results. Investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be higher or lower than the performance quoted. For performance data current to the most recent month end, please call (844)875-2288, or visit www.VistaShares.com. As of 2/21/26.

Exposure by Sector (%)

| | |
|------------------------|--------|
| Information Technology | 88.46% |
| Industrials | 11.54% |

Exposure by Country (%)

| | |
|---------------|--------|
| United States | 59.60% |
| Taiwan | 15.30% |
| China | 9.65% |
| South Korea | 5.56% |
| France | 3.19% |

Important Information

Investors should consider the investment objectives, risks, charges and expenses carefully before investing. For a prospectus or summary prospectus with this and other information about the Fund, please call (844) 875-2288 or visit www.VistaShares.com. Read the prospectus or summary prospectus carefully before investing. Investing involves risk, including possible loss of principal.

The BITA VistaShares Artificial Intelligence Supercycle Index is a rules-based composite index that tracks the market performance of companies, listed on global stock exchanges, that derive their revenues from producing high performance semiconductors, and building and operating AI-enabled applications and datacenters.

Artificial Intelligence Risk. Issuers engaged in artificial intelligence typically have high research and capital expenditures and, as a result, their profitability can vary widely, if they are profitable at all.

Equity Market Risk. Common stocks are generally exposed to greater risk than other types of securities, such as preferred stock and debt obligations, because common stockholders generally have inferior rights to receive payment from specific issuers.

Technology Sector Risks. The Fund will invest substantially in companies in the technology sector, and therefore the performance of the Fund could be negatively impacted by events affecting this sector.

Foreign Securities Risk. Investments in securities or other instruments of non-U.S. issuers involve certain risks not involved in domestic investments and may experience more rapid and extreme changes in value than investments in securities of U.S. companies.

Models and Data Risk. The composition of the Index is heavily dependent on proprietary quantitative models as well as information and data supplied by third parties ("Models and Data").

Tracking Error Risk. While the Fund generally seeks to track the performance, before fees and expenses, of the Index, the performance of the Fund and its Index may differ from each other for a variety of reasons.

Concentration Risk. To the extent that the Fund concentrates in an industry, it will be subject to the risk that economic, political, or other conditions that have a negative effect on that industry will negatively impact the Fund to a greater extent than if its assets were invested in a wider variety of industries.

Industry Risks. The Fund is subject to the following risks:

Semiconductor Industry Risk. Competitive pressures may have a significant effect on the financial condition of semiconductor companies and, as product cycles shorten and manufacturing capacity increases, these companies may become increasingly subject to aggressive pricing, which hampers profitability.

Datacenter Industry Risk. The datacenter industry faces numerous challenges that could significantly impact the financial performance of companies operating within this sector.

Software Industry Risk. The software industry can be significantly affected by intense competition, aggressive pricing, technological innovations, and product obsolescence.

New Fund Risk. The Fund is a recently organized management investment company with no operating history. As a result, prospective investors do not have an extensive track record or history on which to base their investment decisions.
