Exchange	NYSE
Index Ticker	SOLBE20N

Definitions

Distribution Rate: The annual rate an investor would receive if the most recent fund distribution remained the same going forward. The Distribution Rate represents a single distribution from the Fund and is not a representation of the Fund's total return. The Distribution Rate is calculated by multiplying the most recent distribution by 12 in order to annualize it, and then dividing by the Fund's NAV.

12-Month Trailing Distribution Rate: Represents the Distribution Rate an investor would have received if they had held the fund over the last twelve months, assuming the most recent Ex-date NAV. To calculate the 12-Month Distribution Rate, the previous 12 distributions are summed (including income, capital gains, and return of capital during the period), and divided by the most recent Ex-date NAV.

30-Day SEC Yield: 30-Day SEC Yield is based on a formula mandated by the Securities and Exchange Commission (SEC) that calculates a fund's hypothetical annualized income, as a percentage of its assets. A security's income, for the purposes of this calculation, is based on the current market yield to maturity (in the case of bonds) or projected dividend yield (for stocks) of the fund's holdings over a trailing 30-day period. This hypothetical income will differ (at times, significantly) from the fund's actual experience; as a result, income distributions from the fund may be higher or lower than implied by the SEC yield.

Reasons to Consider

Seeks High Monthly Income

ACKY seeks to generate high monthly income by investing in an equity portfolio and implementing a data-driven options investment strategy.

Core Equity Exposure

ACKY provides full cap range equity exposure that can be considered a portion of the core equity allocation in a well-diversified portfolio.

Professional Options Management

Leverage the years of experience and rigorous research process employed by the team managing VistaShares' options-based income ETFs.

There is no guarantee of how the Fund will perform in the future. There is no assurance the Fund will make a distribution in any given month and the following may vary greatly.

Distribution Information

As of 09/26/2025

Distribution Frequency	Monthly
Distribution Rate	15%
12-Month Trailing Distribution Rate	-
Distribution Amount / Share (\$)	\$.25150
Distribution Amount / Share (%)	1.25%
30 Day SEC Yield	-

*As of 09/30/2025, The 30-Day SEC Yield is calculated with a standardized formula mandated by the SEC. The formula is based on maximum offering price per share and does not reflect waivers in effect.

Distributions made by the Fund have been classified as a return of capital and may be comprised of options premiums, dividends, capital gains, and interest payments. As of the most recent distribution of the Fund 94.46% was estimated to be return of capital.

Top 10 Holdings (%)

Uber Technologies Inc. (UBER)	20.15%	Chipotle Mexican Grill Inc	8.47%
Brookfield Corporation (BN)	17.99%	Amazon.com Inc	8.17%

Market Price	1.1%	--%	-	--%	-

As of 09/30/2025, The performance data quoted represents past performance and does not guarantee future results. Investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be higher or lower than the performance quoted. For performance data current to the most recent month end, please call (844)875-2288, or visit www.VistaShares.com. A fund's NAV is the sum of all its assets less any liabilities, divided by the number of shares outstanding. The market price is the most recent price at which the fund was traded.

Distribution Table

Investments involve risk, including the loss of principal.

Past performance does not guarantee future results.

Important Information:

Index / Strategy Risks. The Index's holdings are derived from publicly available data, which may be delayed relative to the then current portfolio of Pershing Square Capital. Consequently, the Fund's holdings, which are based on the Index, may not accurately reflect Pershing Square Capital's most recent publicly disclosed investment positions and may deviate substantially from its actual current portfolio. The equity securities represented in the Index are subject to a range of risks, including, but not limited to, fluctuations in market conditions, increased competition, and evolving regulatory environments, all of which could adversely affect their performance.

Focused Portfolio Risk. The Fund will hold a relatively focused portfolio that may contain exposure to the securities of fewer issuers than the portfolios of other ETFs. Holding a relatively concentrated portfolio may increase the risk that the value of the Fund could go down because of the poor performance of one or a few investments.

Derivatives Risk. Derivatives are financial instruments that derive value from the underlying reference asset or assets, such as stocks, bonds, or funds (including ETFs), interest rates or indexes.

Options Contracts. The use of options contracts involves investment strategies and risks different from those associated with ordinary portfolio securities transactions. The prices of options are volatile and are influenced by, among other things, actual and anticipated changes in the value of the underlying instrument, including the anticipated volatility, which are affected by fiscal and monetary policies and by national and international political, changes in the actual or implied volatility or the reference asset, the time remaining until the expiration of the option contract and economic events.

Swap Agreements Risk: Swap agreements are entered into primarily with major global financial institutions for a specified period which may range from one day to more than one year. In a standard swap transaction, two parties agree to exchange the return (or differentials in rates of return) earned or realized on particular predetermined reference or underlying securities or instruments.

Equity Market Risk. Common stocks are generally exposed to greater risk than other types of securities, such as preferred stock and debt obligations, because common stockholders generally have inferior rights to receive payment from specific issuers. The equity securities held in the Fund's portfolio may experience sudden, unpredictable drops in value or long periods of decline in value.

U.S. Government and U.S. Agency Obligations Risk. The Fund may invest in securities issued by the U.S. government or its agencies or instrumentalities. U.S. Government obligations include securities issued or guaranteed as to principal and interest by the U.S. Government, its agencies or instrumentalities, such as the U.S. Treasury.

New Fund Risk. The Fund is a recently organized management investment company with no operating history. As a result, prospective investors do not have a track record or history on which to base their investment decisions.

Newer Sub-Adviser Risk. VistaShares is a recently formed entity and has limited experience with managing an exchange-traded fund, which may limit the Sub-Adviser's effectiveness.
